

Building Health Checklist

A periodic audit checklist to track the structural condition of a building.

- Visual crack survey - width, pattern, progression
- Concrete cover and rebar corrosion check
- Foundation settlement indicators
- Waterproofing membrane condition across wet areas
- Drainage and stormwater discharge check
- Fire safety and structural load compliance notes
- Recommended re-inspection interval

Need a full technical assessment?

This checklist is a starting point. For a detailed, engineer-led inspection with a written report and repair recommendations, request a site visit at prisciconstructions.com or call us directly.
