

Building Inspection Checklist

A field-ready checklist for assessing structural and waterproofing health.

- Exterior wall cracks - hairline vs. structural
- Roof / terrace slab ponding and drainage slope
- Expansion joint condition and sealant integrity
- Basement and retaining wall seepage signs
- Bathroom and wet-area waterproofing membrane status
- Rebar corrosion / concrete spalling indicators
- Plumbing chase and pipe penetration sealing
- Paint blistering and efflorescence marks

Need a full technical assessment?

This checklist is a starting point. For a detailed, engineer-led inspection with a written report and repair recommendations, request a site visit at prisciconstructions.com or call us directly.
