

Leak Diagnosis Checklist

A structured approach to tracing the true source of a water leak.

- Map the leak against the floor plan above
- Check for staining, discoloration, and mold growth
- Test plumbing lines under pressure
- Inspect terrace / roof membrane continuity
- Check expansion joints and construction joints
- Moisture meter and thermal imaging survey
- Confirm source before recommending repair method

Need a full technical assessment?

This checklist is a starting point. For a detailed, engineer-led inspection with a written report and repair recommendations, request a site visit at prisciconstructions.com or call us directly.
